A unique concept

The Gravel Gang is a diverse mix of volunteers, who want to do a good deed in nature, make a difference and, at the same time have a nice and cozy time together. The participants are primarily anglers, but everyone can participate.

It does not require special skills to participate.

- → Families,
- → Young people,
- → Companies,
- → Schools and other educational institutions
- → Local communities,
- \rightarrow Etc.

We work with improvements in streams, - not only for trouts, but for the entire ecosystem, and therefore focus on versatility, variation and thus biodiversity.

6 years of restorationsprojects by The gravel Gang.

- 1400 volunteers.
- ▶ 120 "clean" restorationsprojects.
- 120 projects with different contents.
- Laying out spawning gravel, hidingstones, planting good aquatic plants, removing barriers, planting trees, population analyses, PR, water- and fishcare on school timetables, electrofishing for mother-fish, releases, ventilation, sea trout safari, advice and consulting, etc.
- Collaborates with everyone, like rings in the water..

The positive effects on the trout population.
